

November 1, 2023

Dear editor,

At the invitation of Magnús Halldórsson, we are submitting the manuscript entitled "A Wait-free Queue with Polylogarithmic Step Complexity" to the special issue of the journal Distributed Computing for papers from the PODC 2023 conference. The paper describes a concurrent implementation of a shared queue data structure for shared-memory systems that achieves better step complexity than previous ones.

Regards,

Hossein Naderibeni and Eric Ruppert
